

CONNECTED SOLUTIONS FOR SEAPORTS

Track - Manage - Optimize

**INCREASE OPERATIONAL EFFICIENCY AND
IMPROVE TURNAROUND MANAGEMENT**

As an IoT expert, Adveez ensures the end-to-end development and implementation of its solutions :

- 📍 Engineering, design and manufacturing of data capture hardware modules
- 📍 Creation of the Localéez® web platform with application to process and display information
- 📍 Brand neutral and interoperable
- 📍 Expertise in radio communication network

UNPOWERED ASSET TRACKING

The IOTM module (Indoor Outdoor Tracking Module) combines both GPS and radio frequency to allow high accuracy indoor and outdoor tracking of assets. Our solution is easy to deploy, use and maintain. Two options are available, start & stop or tracking mode. Asset location and status are displayed on Localeez® web platform and mobile app.

In/Outdoor tracking

Tracking up to 2-3m

Battery life 2-3 years

Easy to install & maintain

MOTORIZED ASSET MANAGEMENT

Our FAMA module is a global connected solution for powered assets fleet management including : maintenance, cleaning and operational vehicles. Automatic speed control with tamper-proof system are available to enhance safety on the ground. Our in-house engineered solution includes robust hardware modules with customized Localeez® web platform and mobile app to process and display captured reliable information.

USERS MONITORING & TOUCHLESS TECHNOLOGY

Our touchless technology improves fluidity and access control to some zones or vehicles, to monitor users presence and operations such as idle, working, in use, etc. Alerts are sent to prevent accidents and enhance safety on sites with low visibility.

REAL-TIME DATA MANAGEMENT WITH LOCALEEZ®

The webplatform Localeez® displays reliable data in real time from all indoor & outdoor assets. It enhances your operations management and proactively predict your maintenance. Tracking performances made it easy and immediate to optimize and improve your ROI.
