## FLEET ASSET MANAGEMENT

FAMA (Fleet Asset Management for Airports) is a global connected solution for GSE fleets of powered assets. Our in-house engineered solution includes robust hardware modules with customized Localeez® web platform and mobile app to process and display captured information.

In/Outdoor tracking

Hour meter

GSE status

Temperature

Shock detection

Speed

Embedded geofence

Access control

Hands-free technology

GSE alerts

Energy level

Vibration

Pressure

API neutral

## UNPOWERED ASSET TRACKING

The IOTM module (Indoor Outdoor Tracking Module) combines both GPS and radio frequency to allow high accuracy indoor and outdoor tracking of assets. Our solution is easy to deploy, use and maintain. Two options are available, start & stop or tracking mode. Asset location and status are displayed on Localeez® web platform and mobile app.

In/Outdoor tracking

Tracking up to 2-3m

Battery life 2-3 years

Easy to install & maintain

## SPEED CONTROL

The Speed Control System is a light system: one module per motorized asset and detection beacons. When the vehicle gets closer to a restricted speed area, it automatically and smoothly slows down. Out of these areas, the speed is released to normal state to ensure productivity.

Two modes are available : Timer or Entrance & Exit.

Speed reduction up to 5km/h

Safety

Continuous system

Easy to install & maintain

Customizable operating parameters

Tamper-proof

## REAL-TIME DATA MANAGEMENT

The webplatform Localeez® displays reliable data in real time from all indoor & outdoor assets. It enhances your operations management and proactively predict your maintenance. Tracking performances made it easy and immediate to optimize and improve your ROI.

Customizable operating parameters

Continuous system

Easy to install & maintain

In/Outdoor tracking

GSE status

GSE & Users alerts

Interoperable

Reduce accident rate

Reduce maintenance cost

140+ airports

15,050+ equipped assets

Optimize fleet size

Enhance operations
